

Twin Peaks

Initial Meeting Notes with Janice

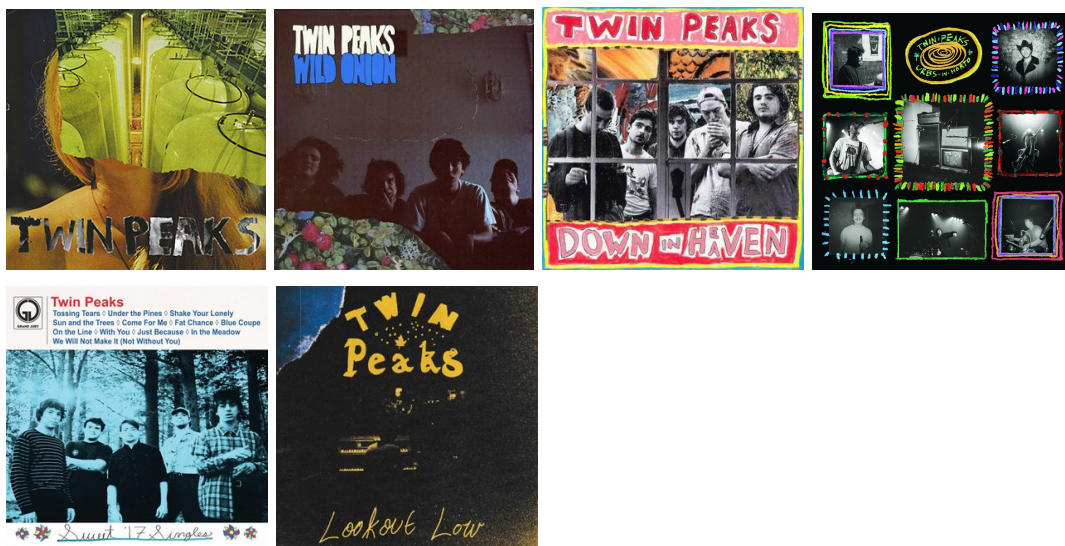

11/3/21

Color Palette: greens, blues, and yellow to replicate the colors present in all the album covers

- Since the album covers do have brighter hues of these colors, and will be displayed on the website, the background of the website may be better suited to be more muted greens and yellows to not distract or clash

Multi-page: I was thinking of the album covers/critical reception having a separate page

- When you click on the main page → takes you to a different page with all the albums
- Below I included the album covers (the easiest way to find them is on the wikipedia page [https://en.wikipedia.org/wiki/Twin_Peaks_\(band\)](https://en.wikipedia.org/wiki/Twin_Peaks_(band)))

- *The home page will be a large photo of them* → then you click on “About” section and it will have a short bio along with band member headshots with their names underneath. The other tab will be titled “Albums” and will take you to a page where their albums are, along with critical reception.

Tone: fun and lively!
